

ANVER Vacuum Tube Lifter Quick Release, made of 304 stainless steel, allow the operator to quickly change vacuum tube lifter pad attachments for varying load handling requirements. Their use minimizes downtime, maximizing productivity. ANVER's design allows you to fully rotate the pad and lock it in any position. Remember, the complete quick release assembly adds 2.65" (67 mm) to the system's overall headroom requirements.

For Use with Micro & Mini Series Vacuum Tube Systems

Part Number	Description	Attaches To	Added Height	For Use with ANVER Vacuum Tube Lifter VT Models			
				VTVH 90	VTVH 100	VTVH 120	VTVH 140
