

Standard and with Extended Pivoting Handles

The ANVER VB Vacuum-Hoist Lifter is powered by a remote vacuum pump which can be located up to 150 ft. (46m) away from the vacuum head and multiple interchangeable pad attachments for lifting several different load types. Equipped with a vacuum gauge and quick-release, this fully integrated lifter has fingertip controls located right on the handlebar.

The ANVER VB Vacuum-Hoist Lifter can be supplied with an extruded aluminum or steel frame and a wide range of custom vacuum pad attachments to match specific load requirements. Providing positive holding power without drift, it is not weight sensitive and is offered with either an air or electric hoist or air balancer.

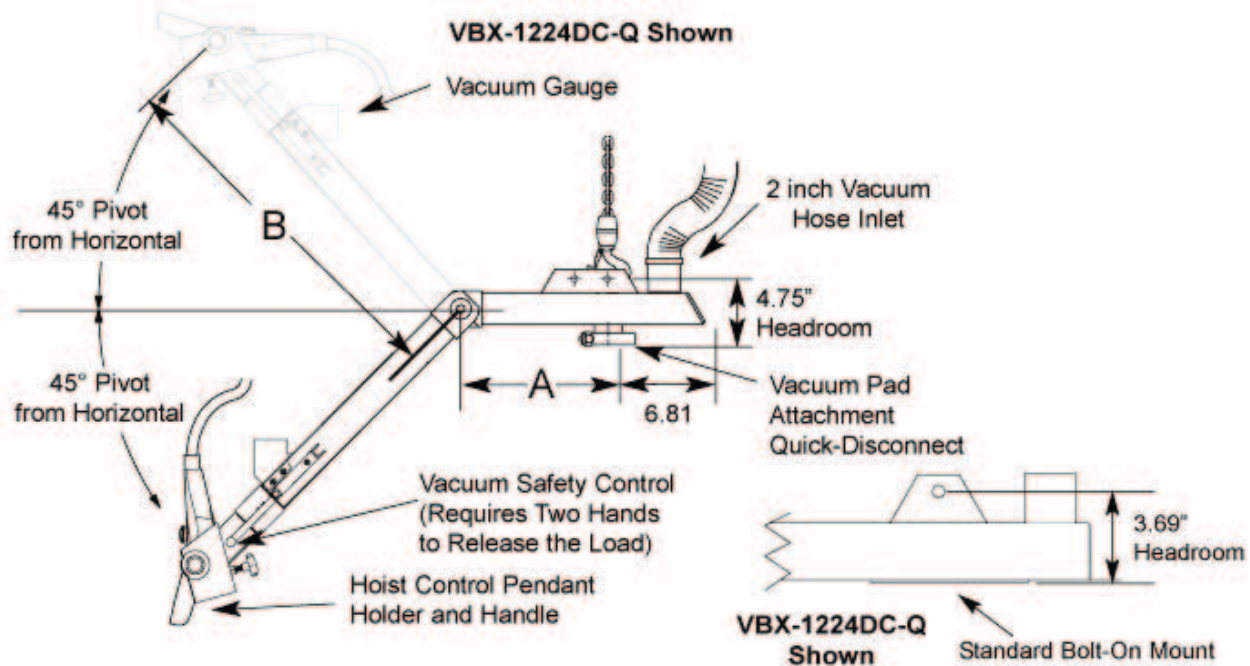

Standard Control Head Specifications

VB Control Head Quick Release Mounting	VB Control Head Bolt-On Mounting	A Horizontal Length [in (mm)]
VBS-DC-Q	VBS-DC-B	14.75 (375)
VBX-24DC-Q	VBX-24DC-B	24 (610)
VBX-30DC-Q	VBX-30DC-B	30 (762)
VBX-36DC-Q	VBX-36DC-B	36 (914)

Extended / Pivoting Control Head Specifications

VB Control Head Quick Release Mounting	VB Control Head Bolt-On Mounting	A Horizontal Length [in (mm)]	A Pivoting Length [in (mm)]
